DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent Number 455,334 to Iske et al.

Iske discloses a lockset having a lock mechanism (B) including an actuator (D) having an aperture (D'), an operator (G'), and a turn button (G) mounted to the operator, the turn button having a head portion (f), and a shaft (F) having a leading helical end portion (F'), and means for self-alignment (column 2, lines 74-94) of the shaft with the aperture of the lock mechanism as the shaft is inserted into the aperture, as in claims 1, 4, and 7.

Iske also discloses the leading helical portion having a plurality of leading helical surfaces (figure 3) that taper and twist from a transition line of the shaft toward an end of the shaft, as in claims 2 and 5, as well as the plurality of helical surfaces smoothly transition between adjacent helical surfaces (figure 3), as in claims 3 and 6.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with respect to locks and handles with helical portions:

Art Unit: 3676

U. S. Patent Number 5,816,086 to Russell, IV, U.S. Patent Number 4,813,723 to Anderson et al., 2,131,458 to Turner.
